

Jake Wyatt

AI Engineer

jake_wyatt@isp.com | 555-555-5555 | Athens, GA,

Profile

Deep knowledge of machine learning algorithms, statistical modeling and data structures. Proficient in various industry-standard programming languages along with expertise in AI libraries and frameworks. Strong background designing and developing AI models. Versed in data governance, privacy, and security best practices.

Work Experience

03/2018 - present, Machine Learning Software Engineer, Siemens, Alpharetta, GA

Design machine learning applications in sensor perception and sensor data fusion.

Resolve complex issues pertaining to sensor-modeling, scenario-driven development and corner cases identification.

Coordinate simulation-based generation of training and validation data.

Consistently deliver high quality software within an Agile/Scrum environment.

02/2014 - 03/2018, Machine Learning Engineer, Intel, Remote

Delivered key contributions to various projects entailing development of advanced algorithms and applications of machine learning.

Liaised extensively with multidisciplinary teams to identify, analyze and resolve complex tasks involving industrial application of advanced machine learning.

06/2013 - 12/2013, Data Science Intern, ATN International, Atlanta, GA

Assisted with research into state-of-the-art data science concepts.

Identified and contributed to resolution of technology gaps by designing and coding prototypes.

Education

4.0 GPA | Honors Graduate

3.8 GPA | Dean's List

Skills

AI / ML Technology

Cognitive Computing

Image Recognition

Deep Learning

Amazon AWS

AI Libraries & Frameworks

Statistical Modeling

Robotics

Google Cloud Platform

Requirements Analysis

Natural Language Processing (NLP)

AI Regulations & Ethics

Certificates

- present, Data Science Certificate, Cornell Online Programs
